Reefer monitoring system

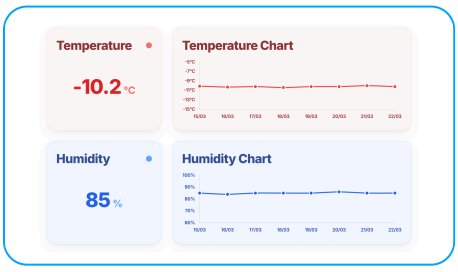

A monitoring system integrated with tracking devices to provide real-time temperature, humidity, and precise location for refrigerated containers with automated anomaly alerts.

Why choose this solution?

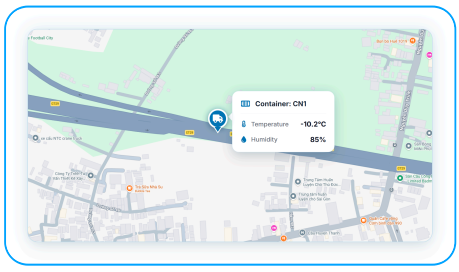

- Compatible with popular reefer brands, including Daikin, Carrier, and Thermo King
- Support multiple transmission protocols, including 4G and LoRaWAN
- Apply directly to containers stored in yards or transported via trucks and ships

Key features

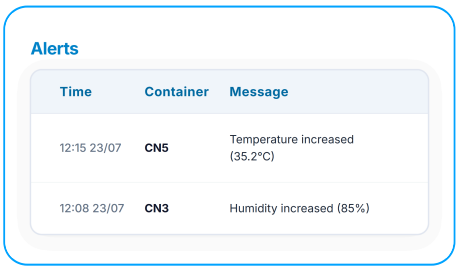

Remote monitoring

Monitor container temperature and humidity in real time

Real-time location

Track container location via GPS

Instant alerts

Automatically alert on abnormalities, temperature, and humidity fluctuations

Applications

- Food & beverage supply chain
- Pharmaceutical & vaccine transport
- Temperature-sensitive chemical transport
