Logistics Solutions

Transportation & visibility | Warehouse | Safety & security

Transportation & visibility solutions

Transportation management system

- Centralized transportation operations
- Optimized dispatch & planning
- Real-time delivery visibility

Container loading calculator

- AI-powered loading optimization
- Visual load simulation
- Flexible loading rules & multi-container support

Container monitoring

- Continuously track reefer temperature, humidity, and location
- Send real-time alerts when thresholds are exceeded
- Enable remote monitoring and control via web and mobile apps

Warehouse & loading optimization

Warehouse management system

- Visual warehouse & location management
- Visual product identification
- AI warehouse assistant

Package & parcel inspection

- Item quantity verification
- Barcode recognition
- Packaging compliance inspection

Safety & security solutions

Access control

- Operate without a network connection
- Detailed reports and HRM integration
- Flexible shift management and workforce scheduling

Parking detection

- Detect license plates anywhere in the image
- License plate noise filtering
- Operate without a network connection

Safety monitoring & compliance

- Real-time safety alerts
- Centralized multi-area monitoring
- Leverage Existing CCTV

Fire alarm monitoring

- 24/7 centralized fire monitoring
- Real-time multi-channel alerts
- Seamless existing-system integration
