Transportation Management Solution

Plan, dispatch, execute, and monitor
transportation operations on a unified platform

Multi-order transportation optimization

Exception handling & plan adjustment

Fleet safety management

How it works

Inputs

- **Orders**
- **Transportation data** (Routes, costs, transit times, etc.)
- **Resources** (Vehicles, drivers, depots)
- **Operating rules** (Capacity, time slots & schedules)

Planning & transportation optimization

- Consolidate compatible orders
- Generate route options
- Evaluate travel time, cost & time windows
- Select the optimal plan

Outputs

- **Transportation plan**
- **Optimized routes**
- **Vehicle & driver assignment**
- **Pickup & delivery tracking**

Applications

3PL & transportation services

Distribution & retail
